A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claims 1, 4, 10, 13, 15, 18-19, 22-23, 26, 28, and 31 are rejected under 35 USC 102 (e) as being anticipated by Zhou et al., U.S. Patent No. 6,280,697.

Regarding to claims 1, 10, 15, 19, 23, and 28, Zhou et al. discloses an apparatus

or method of forming the apparatus similar to what recited in claims 1, 10, 15, 19, 23, and 28. Zhou et al. discloses the apparatus and method of forming the apparatus including the carbon nanotubes deposited in a substrate and whereas the carbon nanotubes having intercalated material such as alkali metal (abstract).

Regarding to claims 4, 13, 18, 22, 26, and 31, Zhou et al. discloses that the alkali metal is intercalated into the carbon nanotubes.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

11. Claims 2-3, 11-12, 14, 16-17, 20-21, 24-25, 27, and 29-30 rejected under 35 U.S.C. 103(a) as being unpatentable over Zhou et al., U.S. Patent No. 6,280,697.

Regarding to claims 2-3, 11-12, 14, 16-17, 20-21, 24-25, 27, and 29-30, Zhou et al. discloses the apparatus and method of forming the apparatus including the carbon

nanotubes deposited in a substrate and whereas the carbon nanotubes having intercalated material such as alkali metal (abstract). However, Zhou et al. doesn't disclose that the alkali metal is doped or deposited as a layer onto the carbon nanotubes layer. However, Zhou et al. discloses that the carbon nanotubes are capable of reacting and accepting alkali metal (abstract). Therefore, it would have been recognized in the art that the carbon nanotubes are react with alkali metal by depositing or doping the alkali metal into the carbon nanotubes.
